Professional Summary

Passionate Java Backend Developer with 2 years of experience in Spring Boot, Hibernate, JPA, Spring-security and SQL. Skilled in DSA with basic front-end knowledge of HTML, CSS, and JavaScript. Quick learner, passionate about building scalable applications.

Work Experience

SNVA Ventures (Java Developer) (2 Year)

April 2023 - Present (Noida)

Responsibilities:

- Worked as a Backend Developer on an **E-Commerce Website** for selling clothing products, building REST APIs using Spring Boot to manage product listings, orders, and payments.
- Developed backend APIs for an **Influencer Management System**, enabling influencers to register, generate unique coupons, and track their earnings and transactions through the CRM system.
- Built backend APIs for a **Company Review Website** similar to Glassdoor, where companies can register, and users can post reviews and ratings.
- Designed and developed a **Content CRM system** using Java, Spring Boot, and Hibernate, enabling efficient content management and improving operational workflow.
- **Integrated XML-based APIs** to automate data exchange processes, enhancing seamless data communication with external platforms.
- Played a key role in developing and maintaining an **Ed-Tech exam portal**, ensuring smooth exam functionality and a user-friendly experience for students and educators.
- Led the creation of a **Real estate lead generation application** using Java technologies, streamlining lead management and improving business efficiency.
